Fall 2008 and Spring 2009 School Workshops:

SMALL SCALE GARDENING STRATEGIES FOR URBAN BACKYARDS AND SCHOOLS

October: “Getting Ready to Garden: Habitat and Garden Planning, Sunlight Patterns, Soil-Building and Composting, Water Use”

Late February: “Seed Propagation/Good Bugs, Bad Bugs”

Early April: “Garden Preparation”

Mid-May: “Planting”

The garden is an authentic learning environment that empowers students through inquiry and problem solving, which in turn stimulates critical thinking and nurtures community action.
